

## Utility Buckets

Utility Bucket - "Slip on the forks" accessory buckets or otherwise called Universal Fit buckets could be utilized with any design or model of extendable reach forklift. If your unit can't be matched with a quick-tach component, another brand new or second-hand universal fit bucket can be located instead. Standard universal lift truck buckets attach to forks that are up to 6" wide and are 48" long. Larger fork pockets could be prearranged via an account executive upon request.

Because universal fit lift truck buckets slip onto the forks directly, they stay on the equipment and are a lot less at risk to damage. These buckets are even 50% deeper than the quick-tach bucket models. This extra room makes them ideal for carrying irregular shaped loads like for instance broken up concrete, backfilling behind walls, tearing off roof trash, elevating roof gravel and moving large debris piles.

### Quick-Tach Buckets

Quick-Tach Buckets are made for extendable-reach lift trucks. They are made to allow positioning of materials way beyond the reach of a loader. A hardened beveled cutting blade on the leading edge and on both sides reinforces stability, resistance to wear and provides supreme durability. Quick-Tach forklift buckets are augmented by scuff bars along the base of the unit that protect it from abrasion.

Quick-Tach lift buckets can in several situations replace the blades and carriage of a forklift, that may weigh anywhere between one hundred to seven hundred pounds. These buckets when set up could free up more load capacity, enabling it to deal with both larger and heavier items. The Quick-Tach is able to pour objects around 1.5 feet higher because of the shorter depth of its bucket. These buckets are built in a customized fashion to be able to suit the specifications of specific makes and models of lift trucks. It is vital to talk to a construction equipment specialist in order to find the customized Quick-Tach bucket solution for all of your requirements.

Lift truck bucket attachments are excellent for ground level work on construction location sites. They are normally used for moving snow in northern parts, and gravel and sand loading. Job location clean-up is one more function the lift truck bucket performs well. The numerous applications the bucket can accomplish saves the company much money and time because it does not need to completely switch tools or machinery and this can help prevent running into overtime.
