The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction client desires.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. What's more, there are more than 90 independent sellers moving lift truck supplies and materials handling equipment. This network enables Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively includes 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck designs vary from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift company in the North American market, thanks to their consistency in retaining a high level of client service quality and optimum product performance to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based equipment expansion venture. Sales of these goods were primarily targeted to state-run companies, large scale businesses, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Domestic lift truck business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of considerable expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling industry. This project greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a contemporary plant which helped set up the company for the manufacture of high end added-value goods suited for export. In 1993, the company had a global sales network and started exporting models they had established through in-house technology, as a sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international markets.
