

## Pulp Clamp

Pulp Clamps - There are actually numerous other forklift attachments that can be utilized in order to make forklifts far more efficient. Snowplow accessories can be mounted onto the front of a lift truck. A scoop bucket can be helpful whenever the job requires moving soil, sand, snow, or gravel. A double block handler permits the person operating the forklift to lift\carry two loads and afterward stack them side-by-side. Several of these accessories are extremely excellent for light to medium duty work.

One more forklift accessory is the package lift clamp, which can carry and move heavier pallets. Moreover, pallet crane forks could be utilized in order to lift and transfer pallets with an overhead crane. A drum clamp attachment is helpful for transporting very heavy drums from one place to another with out having to utilize a pallet. Forklift mounted hoppers enable materials to be transferred and dumped with out having to do it by hand. These hoppers when the bumper is released are self dumping.

There are also accessories available which could transform the lift truck right into a commercial broom or mop. Such attachments are ideal for cleaning boat docks, storehouse floors and parking areas. Forklift mounted platforms come equipped with twin entry doors and could be connected to move employees from one site to another. The mounted platform attachment is ideal for reaching parts which are hard to access, particularly when you have merchandise or materials stored in out of the way places or really up high.

Attachments can be a very useful piece of equipment when installed onto a forklift, transforming a usual lift truck into a mobile crane unit. It is most helpful when moving unsteady or awkward loads. This attachment could either be telescopic, mounted on the carriage itself, or be fixed or even forklift mounted.
