Clark Totalift, covers more than 120,000 particular parts intended for 20 exclusive brands of forklifts and automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts requirements offered by Clark Totalift.

Clark's phenomenal Parts Distribution Stores are conveniently situated in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving productivity and benefiting performance.

Globally, Clark has one of the most amazing dealer support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is at this time a standard feature on every forklift.

Clark has a continual mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities because this method is extremely economical and permits minimal use of resources. Developed to guarantee maximum proficiency, this system is designed to discover and acknowledge the most effective methods for production facility management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to improve the effectiveness and brilliance of their products while minimizing costs. The contemporary value engineering agenda combines modern product development and delivers improved customer support and service within the industry.
