

Barrel Clamp

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic attachment is actually used on lift trucks in order to clutch objects that you wish to transfer utilizing the forklift. Normally, they're utilized in order to handle kegs, paper rolls and barrels, together with a few barrel clamp designs having the ability to revolve the cargo. For instance, the revolving function allows the person operating the forklift to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
