

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

All through their journey, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite market for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the company proudly continues to expand itself into numerous marketplaces globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
